## Corporate Credit Ratings Definitions

Rating	Definition of Corporate Credit Ratings
AAA	The overall credit status is very superior and stability of the future environment is very high.
AA	The overall credit status is superior and stability of the future environment is very high.
A	Though the overall credit status is superior, stability of the future environment is inferior than the higher rating categories.
BBB	Though the overall credit status is good, there exist a little credit risk factors in the future.
BB	Although there is no problem with credit status, there exist credit risk factors in the future.
B	Although there is no problem with short-term credit status, stability of the future environment is low.
CCC	The credit status is doubtful and there is a possibility of default on a monetary debt.
CC	The possibility of nonfulfillment of a contract is high as there exist lots of credit risk factors.
C	The possibility of nonfulfillment of a contract is high and the credit status is very inferior.
D	Already in a default.

※ Note: +/- notching can be assessed for the rating of AA to CCC depending on the relative merits/demerits within the same credit rating level.
